Worksheet Week 5 – Requirements Gathering 1

Working on your group projects

Now is the time you should start working on your group projects.

1. If you have not done so in the previous tutorial, identify and finalise the UN's sustainability goal that you would like to address. This is crucial.
2. Identify **challenges** and **opportunities** related to your goal.
3. Decide what **technological solution** you are going to be creating for your projects.
4. Given the insights from the challenges and opportunities, brainstorm specific **requirements** for the technological solution.
5. Facilitate a discussion to identify common themes and **prioritise** the most critical requirements.
6. Map the identified requirements to potential **technology features** and discuss how these features can address the challenges and opportunities outlined earlier.
7. By the end of this tutorial, you will have collectively identified **challenges**, **opportunities**, and **requirements** for a technology solution that aligns with the UN's Sustainability Goal of your choice. The outcomes will serve as a foundation for your group project that you need to work on within the scope of this course.
8. **Document** your progress on the project and submit your meeting minutes.
